

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1-15 (Cancelled)

Claim 16 (Currently Amended): A system for processing visual information, comprising:

a plurality of cameras for recording visual information[[,]];

a control room in communication with the cameras and having means for displaying recorded visual information[[,]]; and

control means for influencing the means for displaying the recorded visual information display in the control room[[,]]; ~~wherein the system is also provided with~~

storage means for storing ~~the~~ operations performed with the control means to influence the means for displaying the recorded visual information; and

input means for supplying to the storage means an identification of an operator of the control means.

Claim 17 (Currently Amended): The system as claimed in claim 16, wherein the storage means are adapted configured to store the operations performed with the control means in combination with at least a part of the visual information displayed as a result of the operations performed with the control means.

Claim 18 (Currently Amended): The system as claimed in claim 16, wherein the control room ~~is also provided with~~ further comprises communication means and the storage means are adapted configured to store the operations performed with the communication means.

Claim 19 (Cancelled)

Claim 20 (Currently Amended): The system as claimed in claim 16, wherein the system ~~is also provided with~~ further comprises a data processing unit ~~with which configured to generate~~ statistical information ~~is generated~~ from the operations performed with the control means.

Claim 21 (Currently Amended): The system as claimed in claim 20, wherein the system ~~is also provided with~~ further comprises second storage means ~~adapted~~ configured to store the statistical information generated by means of the data processing unit.

Claim 22 (Currently Amended): The system as claimed in claim 20, wherein the data processing unit ~~connects~~ is connected to a control module ~~with which configured to transmit~~ the information displayed in the control room ~~is transmitted~~.

Claim 23 (Currently Amended): The system as claimed in claim 16, wherein the system ~~is also provided with~~ further comprises detection means ~~for~~ configured to ~~observe~~ behavior ~~of an~~ of an the operator of the system.

Claim 24 (Currently Amended): The system as claimed in claim 23, wherein the detection means ~~connect~~ is connected to the storage means for storing the operations performed with the control means, ~~which~~ wherein the storage means are also ~~adapted~~ configured to store the information generated with the detection means.

Claim 25 (Currently Amended): A method of visual surveillance, comprising the steps of:

- [[A)](a) recording visual information by means of a plurality of cameras[[,]];
- [[B)](b) feeding the recorded information to a control room[[,]];
- [[C)](c) selecting by an operator for observation purposes ~~of~~ a part of the available information from the recorded information fed to the control room[[,]]; ~~and~~
- [[D)](d) storing into storage means the information selected by the operator; and

(e) supplying to the storage means an identification of the operator who selects the part of the available information.

Claim 26 (Currently Amended): The method as claimed in claim 25, wherein the information selected by the operator ~~as according to processing step (D)~~ is stored in relation to ~~[[the]]~~ a selection behavior[[u]]r applied for this purpose by the operator.

Claim 27 (Currently Amended): The method as claimed in claim ~~25~~ 26, ~~wherein~~ further comprising the step of generating the statistical information ~~is generated~~ from the selection behavior[[u]]r.

Claim 28 (Currently Amended): The method as claimed in claim 27, ~~wherein~~ further comprising the step of actively influencing the operator using the statistical information ~~is used to actively influence the operator.~~

Claim 29 (Currently Amended): The method as claimed in claim 25, ~~wherein~~ further comprising the step of supplying the control room for processing information recorded by the system ~~can also be supplied~~ with personal identification data.

Claim 30 (Currently Amended): The method as claimed in claim 29, ~~wherein~~ further comprising the step of generating the personal identification data ~~are~~ generated by linking visual information to another information source.
